PROFESSIONAL SUMMARY

Entry-level Full-Stack Developer with project experience building web applications using Java, JavaScript, HTML, CSS, and MySQL. Also trained in AWS cloud fundamentals and DevOps concepts, including cloud infrastructure, Linux, Maven, and application deployment workflows. Interested in developing, deploying, and supporting reliable web applications.

TECHNICAL SKILLS

Programming: Java, C++
Frontend: HTML5, CSS3, JavaScript, Responsive Web Design
Backend: Java, Full-Stack Development
Database: MySQL, SQL
Cloud: AWS fundamentals: EC2, S3, IAM, VPC, and RDS
DevOps & Tools: Linux fundamentals, Maven, Git, GitHub, Web Deployment, CI/CD concepts

PROJECTS

Private Theatre Management System | Full-Stack Developer
Technologies: HTML, CSS, JavaScript, Java, SQL
- Developed a web-based platform for managing private theatre services, bookings, and user interactions.
- Designed responsive interfaces and implemented modules to support the booking workflow.
- Applied Java and SQL concepts to support application logic and database-driven functionality.
